

Sony Xperia Z3 Battery Replacement

Replace the battery in your Sony Xperia Z3.

Written By: Dominik Schnabelrauch

INTRODUCTION

Use this guide to replace the old battery in your Sony Xperia Z3.

TOOLS:

- [iOpener](#) (1)
 - [Suction Handle](#) (1)
 - [iFixit Opening Picks set of 6](#) (1)
 - [Tweezers](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Back Cover

- Heat the back cover of your Xperia Z3 to loosen the adhesive underneath.
 - Lift up the back cover with a suction handle and put an opening pick in the gap.
 - Move the pick carefully around the edges to loosen the adhesive on every side of the phone.
- ⚠ Don't put the pick in too deep under the back cover to not damage any parts inside the phone.

Step 2

- After the adhesive around the edges is loosened, pull up the back cover with your suction handle.
- Use a tweezer to pull out two black straps that are attached to two pieces of adhesive right on the battery.

Step 3

- Gently pull out both of the black straps with the adhesive tabs.

⚠ Never pull out the straps upwards but always sideways. It can easily happen that you rupture the adhesive tabs right in between. In this case use a plastic card to pry off the back cover carefully, use heat if necessary !

Step 4

- After pulling out the adhesive tabs, you can lift the back cover and remove it.

Step 5 — Battery

- Unplug the battery flex connector.
- Use a tweezer to gently pull off the adhesive strip on the bottom part of the battery.

Step 6

- Use a spudger on the left side of the frame to lever out the battery.
 Be careful with the spudger - there are cables beneath the battery!
- Remove the battery.

To reassemble your device, follow these instructions in reverse order.
